

REMARKS

Applicant elects with traverse Group I (claims 30-34), for prosecution. Applicant further elects as species N-amidino-3,5-diamino-6-chloropyrzzine-2-carboximide hydrochloride dehydrate and elects adenosine receptor agonist. Claims 30-34 are readable on these species.

Applicant traverses the restriction between Group I and Group III. These groups have unity of invention as they are a product and a process of use of the product, and they share a common technical feature. Likewise, Group V shares unity with Groups I and III as a product of the claimed process for using the claimed composition. Applicant reserves the right to rejoin non-elected claims and/or to file divisional applications.

It is believed that this response is a complete reply to the restriction requirement and thus Applicant respectfully requests that prosecution proceed. Applicant further submits that the claims are in condition for allowance and requests that the Examiner so indicate and issue a notice of allowability and that the application be passed to issue. Should the Examiner have any questions which might be amenable to a telephone interview, the Examiner is invited to contact undersigned counsel to discuss such issues.

Dated: 4/30/2007

Respectfully submitted,

By
